

A large cargo ship deck is shown, heavily loaded with stacks of cut logs. A yellow crane is positioned on the deck, and an orange excavator is visible near the stern. The ship is docked at a pier, with a large pile of logs on the ground to the left. The background features a body of water and distant mountains under a dramatic, cloudy sky at sunset or sunrise. The text "CSR Policy" is overlaid in white on the log stacks.

# CSR Policy

## Clipper Group CSR Policy

We strive to make a positive impact.

As a maritime player with a global presence at sea and onshore, we recognize our social, environmental, and ethical responsibility. We wish to push for a positive development by running our business in a responsible manner and by promoting sustainable business behavior in our network. We are committed to and do build our efforts on the 10 principles of the UN Global Compact. We are setting measurable targets within the areas where we believe our efforts may have the greatest impact.

Clipper has conducted corporate social responsibility reports since 2016 – these can be found on Clipper's website [here](#).

The above policy has been adopted by the Clipper Group Ltd. Board on 13 June 2025 and will be reviewed by the Senior Management Team on an annual basis.
